

ABSTRACT OF THE DISCLOSURE

One embodiment of the present invention concerns novel end effectors that may incorporate hexagonal drive shafting and are particularly well suited to be used as scrubbing/abrasive or wiping elements for the cleaning of surfaces. Another embodiment of the present invention is a tool that can wipe and scrub a surface to be cleaned and dry the same surface. Yet another embodiment of the present invention is a tool or a kit of tools that can be adapted to either wipe or scrub a surface or the tool may be adapted to accomplish other tasks such as acting as a power screw driver, power nut-driver, power hand drill, power sander, etc. And yet another embodiment is a novel powered device that serves as a duster.
